PROFILE

High-agency full-stack product engineer shipping React/TypeScript UX, API-integrated product flows, testing infrastructure, and AI-assisted development workflows. Fast learner, self-directed, and strong in product polish, SQL-backed systems, and execution.

Product ownership Own checkout UX, API coordination, validation, loading/error states, and QA follow-up with no reported checkout defects after release.	Production scale React/TypeScript product UI used by 20k+ active users across Europe.
Testing + AI Introduced test coverage with Vitest, RTL, MSW, and Playwright, then ran agentic workflow workshops for AI-assisted engineering.	Speed + ownership Self-directed builder across product UI, API contracts, testing, performance, release follow-up, and fast stack ramp-up.

CORE SKILLS

Frontend React, Next.js, TypeScript, Tailwind CSS, Radix UI, Storybook, Zustand.	Data / APIs REST, GraphQL BFF exposure, PostgreSQL/SQL, Prisma-backed API contracts, Drizzle ORM.	Testing / AI Vitest, RTL, MSW, Playwright, Cursor/Claude Code, Codex/LLM flows.	Delivery React Native, Expo, Vite, Docker, Git, accessibility, performance, async execution, fast learning.

EXPERIENCE

Frontend Developer - GreenState AG / ClickMind.com - Ship production features in a multi-tenant React/TypeScript app for 20k+ active users, owning UX, API contracts, and release follow-up. - Implemented Stripe Checkout across checkout UX, API coordination, loading/error states, validation, and QA follow-up; released without reported checkout defects. - Introduced frontend testing from zero coverage: Vitest, React Testing Library, MSW, and Playwright for unit, API-mocked, integration, and browser-level regression coverage. - Lead design-system migration from Styled Components and Storybook 8 to Radix UI, Tailwind CSS, and Storybook 10 using a strangler approach. - Integrate data-heavy screens with TanStack Query, Axios interceptors, token refresh, caching, pagination, and Prisma-backed API contracts. - Ran dev-team workshops on agentic development workflows and initiated an internal executive/product workflow using an adapted Matt Pocock /grill-me-with-docs pattern to connect Jira/Confluence and turn business context into IT-ready briefs.	08/2025 - Present
Freelance Frontend & Mobile Developer - Self-Employed - Delivered React, Next.js, and React Native/Expo projects from scope and technical planning through implementation, API integration, release prep, testing, and iteration. - Built Next.js systems with TypeScript, Tailwind CSS, Supabase/Neon PostgreSQL, Drizzle ORM, Sanity CMS, Resend email, Framer Motion/GSAP, deployment, and Lighthouse-focused quality checks. - Built Sveznalica, a React Native/Expo educational app currently in Google Play closed testing; owned mobile UI, navigation, Android build/testing flow, and store-readiness work. - Built PSFM Diet Tracker as a React Native/Expo product with reusable screens, forms, stateful flows, mobile-first UX, and API-ready boundaries. - Built an AI-powered analytics frontend for the Xstate app on Upwork, helping e-commerce sellers act on performance insights; used React and GraphQL in a backend-for-frontend style.	2022 - Present

SELECTED PRODUCT WORK

Production Product Delivery Stripe checkout UX, API coordination, validation, loading/error states, and QA follow-up with no reported checkout defects.	Testing / Regression Coverage Vitest, RTL, MSW, and Playwright coverage from zero in production React/TypeScript codebases.
Data-heavy Product UI TanStack Query, token refresh, caching, pagination, API contracts, and Prisma-backed data flows.	Full-stack Web Projects Next.js, Sanity CMS, Tailwind CSS, Resend, Framer Motion/GSAP, SEO, product galleries, and linked live client sites.
AI-native Engineering Agentic dev workshops, Jira/Confluence-grounded requirements, and Codex/LLM practices for planning, review, tests, and implementation.	Better Stack Fit High-agency full-stack product engineering: polished UX, API/data flows, testing discipline, fast learning, async execution, and AI-assisted shipping.

Certifications & Training Frontend Masters: React Performance v2, JS & React Patterns, Front-End System Design, Testing Fundamentals, Cursor & Claude Code AI Setup, Hard Parts of JS. Boot.dev: TypeScript, JavaScript, SQL, Git, HTTP Clients/Servers in TypeScript. Udemy: NPM packages, Vite.

Additional Experience Vega IT UX/UI internship: HTML5, SCSS, responsive UI foundations, product design handoff, and design-system thinking.	Live Project Links agileonion.rs pejovic-invest.rs amadea.rs autoskoladt.rs
